

DHRUV SURANA

Data Analyst • Analytics & Data Engineering

Richardson, TX | (469) 347-0376 | dhruvsurana22@gmail.com | [linkedin.com/in/dhruvsurana](https://www.linkedin.com/in/dhruvsurana) | github.com/dhruvsurana

Business Analytics & AI student (GPA 3.98) who builds end-to-end data pipelines and executive dashboards in Python, SQL, PostgreSQL, and Tableau. Turned 2,500+ federal procurement records into 8 decision-driving dashboards for county governments. Seeking a Summer 2027 Data Analyst / Data Engineering internship.

EDUCATION

The University of Texas at Dallas — Richardson, TX

B.S. in Business Analytics & Artificial Intelligence • Minor in Innovation & Entrepreneurship

Expected May 2028

GPA: 3.98 / 4.00

Honors: Dean's List (Fall 2024, Spring 2025), Undergraduate Dean's Council (JSOM)

Relevant Coursework: Database Foundations for Analytics, Data Science for Business Applications, OOP with Python, Advanced Quantitative Business Methods, Web Analytics.

EXPERIENCE

Data Analytics & AI Intern — Vendors First

Jul 2026 – Present

Remote

- **Built an end-to-end government-procurement analytics platform** processing 2,500+ federal contract and assistance awards across 4 California counties, developing Python ETL pipelines that integrate USAspending data into PostgreSQL.
- **Designed scalable data models powering 8 executive dashboards** covering procurement trends, vendor concentration, agency performance, funding utilization, and payment analytics for county governments.
- **Automated ingestion, transformation, and validation across 6 federal award categories** and engineered reusable validation workflows that caught data-quality errors upstream, replacing manual prep and improving reporting reliability for executive decisions.
- **Partnered directly with the CTO** to translate complex procurement data into BI solutions using Python, PostgreSQL, REST APIs, Docker, and Git.

Business Strategy & Automation Intern — Shri Aadinath Exports

May 2025 – Jul 2025

Mumbai, India

- **Prioritized 10 operational inefficiencies across 5 departments** via root-cause analysis, then designed 7 low-code automations (Make.com, Airtable) that cut manual workload and reduced order errors.
- **Analyzed approval-bottleneck patterns and implemented Slack-based escalation workflows**, improving cross-team response time and throughput.
- **Defined product requirements for a barcode-based inventory system** targeting 95%+ stock accuracy, and presented the automation strategy to company leadership.

PROJECTS & COMPETITIONS

Celonis Process Mining Hackathon — 1st Place

- **Won 1st place** by mining enterprise process data to surface bottlenecks, rework loops, and workflow inefficiencies; recommended KPI-driven improvements projected to cut operational cycle time 30%+.

RetainIQ — Google Business Analytics Competition (Top 8 Finalist)

- **Built an AI-assisted customer-retention platform** that flagged high-risk subscribers through behavioral analytics; designed segmentation, health-scoring, and executive dashboards that turned behavior data into actionable retention strategy.

Dhruv AI — AI-Powered Lead-Generation Platform

- **Cut lead-processing time 87.5% (2+ hrs → <15 min)** by launching an MVP automating lead capture, AI qualification, and proposal generation; validated on 20+ leads via user interviews and iteration.

TECHNICAL SKILLS

Languages: Python, SQL, R, Java

Analytics & BI: Tableau, Excel, Pandas, NumPy, statistical analysis, dashboard & KPI development

Data Engineering: PostgreSQL, Google BigQuery, ETL pipelines, data modeling, data cleaning, REST APIs

Tools & Cloud: Git, GitHub, Docker, AWS (foundational)

LEADERSHIP

SOC Officer — Indian Students Association, UT Dallas

Aug 2025 – Present

- **Drove 40% membership growth (150 → 210+)** through targeted outreach; managed a \$25K+ budget across 6 large-scale events (200–500+ attendees) while cutting costs 25% and holding 4.6/5.0 satisfaction.
